

Underbody Protection

It's not just the paintwork on your new vehicle that needs protecting. Your vehicle's underbody is constantly under attack from pollutants and harmful substances.

Our Underbody Protection is a specially formulated solution professionally applied to all the panels and moving parts of your vehicle's underbody, keeping it protected from harmful and corrosive elements.

Our Underbody Protection prevents unwanted noise in the area of plastic against each other, as well as against metal and rubber. The Silicone Protect reduces frictional wear due to a colourless grease film.

Benefits

- ✔ Stops rust and corrosion
- ✔ Long-lasting
- ✔ Non toxic spray
- ✔ Eco friendly

In addition, our Underbody Protection is temperature-resistant from -40 degrees to +200 degrees and particularly adhesion to plastic and rubber.

It's ideal for moving parts, as well as for creaking noises and for lubricating plastic to rubber, plastic to metal and ceramic, as well as from rubber to painted surfaces.
